

Good Address vs. Bad Address

When entering GIS data, you need to know where the animal lived or where the animal was found.

✓ Good Address

1635 W. Smith St., New Orleans 70118

1453 Cohn Rd., Orlando FL 43012

West 15th and Smith St., Columbus, OH

17th Ave. & Woodlawn Pl., 43210

✗ Bad Address

16 smith new orleans

my backyard

near post box on 15th

in a box on way to work

**If Google Maps can't find the address,
it's not good enough!**

Remember, a good address always has these three things:

- 1. A city and state or zip code**
- 2. A numbered street or cross-streets**
- 3. Street type (Ave., St., Drive, etc.) and compass points (N, S, NW, etc.)**
