

Below are some major signs that indicate an infectious disease may be present. If you observe these or other signs that concern you, follow the procedure below and **seek help from your veterinarian**.

**If you observe any signs of infectious disease, be sure to:**

1. **Record** the signs you observe on the animal's exam form
  2. **Isolate** the animal away from healthy animals
  3. **Disinfect** the exam area and any instruments you used and **wash** your hands well
  4. **Contact** your veterinarian to determine next steps
-
